2. About

2.1. Why should you switch to PlotSquared?

3. API

3.1. API Documentation

3.2. API Flag Documentation

3.3. Event API

4. Basic Functionality

4.1. Plot Backups

5. Commands

5.1. Commands

6. Configuration files

6.1. Settings.yml

6.2. Storage.yml

6.3. Worlds.yml

7. Customization

7.1. Placeholders

7.2. Plot components

7.3. Plot component presets

7.4. Single plot area

8. Flags

8.1. Plot Flags

9. Installation

9.1. Installation

9.2. Migrating from an older major release

9.3. Updating from 1.12 to 1.13

10. Permissions

10.1. Bypass Permissions

10.2. Permission Packs

11. Schematic

11.1. Schematic Generation

11.2. Schematic on claim

11.3. Schematic export

12. World optimization

12.1. Chunk Processor

12.2. Plot analysis

12.3. World reduction

13. Other documentation

13.1. Block Buckets

13.2. Chestshop Compatibility

13.3. Plot membership tiers

13.4. Vanilla Tags

13.5. UUID conversion

13.6. WorldEdit/FAWE Features

14. Changelog archive

14.1. Spigot changelog v4 to v5

14.2. Changelog (old, on the "Release" tab)
